Dear Client of A2Z Diagnostics,

A2Z Diagnostics, a leader in molecular diagnostic testing, is pleased to announce that we are offering our comprehensive COVID-19 testing to detect the virus using PCR technology and screen for those exposed to COVID-19 using the antibody test.

We are now performing COVID-19 PCR testing for all essential healthcare workers, and patients preprocedural before they undergo their procedures in an office or ASC. As per many state regulations, all patients should be screened for active COVID-19 before any planned procedure.

We are also offering private businesses the same service as employees return to the workforce. As our country starts to open up and get back to work we can give your employees, patients, and staff these powerful diagnostic testing tools so that you can open up safely and protect the wellbeing of your respective teams and patients.

For more information on how the A2Z Diagnostics team can assist, please contact us at 732-542-3200.

Regards,

A2Z Diagnostics
